Mother's Day: The changing roles of mothers call for other changes

Mother, the basis of existence of you, me and all the people; who brings us to the world, introduces us to this world, and raises us to create our own world; who teaches us to take steps, chase happiness and soar high. We all have the utmost respect to our own mother, to the motherly figures in our lives and to all those great mothers for their love, compassion, and support in making their children the responsible citizens. Hats off to all the mothers for laying a strong foundation for a peaceful and harmonious society!

In the changing society, we have been witnessing a continuum of change in roles of mothers. From a traditional home maker's role, mothers' role has changed into working mothers for a while now. The leaps and bounds of changes in women's lives in professional arena come with the pros and cons. More recently, women are noted to make a big sacrifice of foregoing motherhood in lack of congenial environment for balancing professional and personal lives. Oftentimes a mother's motherly love bends down or even breaks under the multiple pressures from work, home and other obligations. And that is the beginning of problems with children resulting into whole host of social problems.

While it is important and necessary to have diversity in workforce for sustainable socioeconomic growth, it is equally important to note how that translates to the value of a family in a society. The pressing issue is for the other half of the population to adapt to the changing roles of women from a full-time mother to a super-mom/manager/CEO. If that is not recognized early enough, society with single women and couples without children may dominate our society in near future. Meanwhile, if we all make conscious efforts from our levels, we may continue to have a society full of mothers keeping peace and harmony in the family, community, society, and the world. It needs not only the support of each of the family members and the community but favorable government policies in order to create a congenial environment. Wishing for support from each of you out there for preserving your own world of 'mothers'; the oasis of love, the givers of lives, the maintainers of peace and harmony!

- Dr. Shruti Mishra

ठुलो जित

आँखा चिम्म गरेँ , कान बन्द गरेँ , अनि मन स्थिर गरेँ
अनि पो अनुभूति भयो
अर्को हारेपछि आफु जित्ने होइन रहेछ
सबैलाई जिताउन सकेपो नहारिने रहेछ
तेतिमात्रै होइन,
सबैभन्दा ठुलो जित ता यस्तो पो रहेछ

College Letter

Dear Students,

If you are looking for a great school that you will love being a part of, which I know you are, there is one that is definitely worth it. The University of Alabama at Tuscaloosa will fulfill your needs. According to www.ua.edu, the University of Alabama is a beautiful 1,200-acre campus with a leading edge research program and state-of-the-art labs. With over 500 student organizations, Alabama has something for everyone.

Don't forget their outstanding athletics program, incomparable academic opportunities, and best of all, an affordable price.

The University of Alabama really is the Capstone of Higher Education.

The Crimson Tide athletic program is second to none. Bearing the #1 football team in the nation, Alabama is unsurpassed. Not only do they have an outstanding football team, UA offers many different sports like soccer, track and field, rowing, (yes, I said rowing), volleyball, swimming and diving, and many more. The #1 football team in the nation isn't something worth overlooking, but even if you don't play football there are many other sports that could spark your interest. Whether you plan on getting a sport scholarship or just watching from the stands, Alabama is there for you. No matter what sport you play, Alabama has a great athletics department that you want to be a part of.

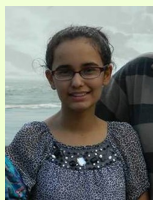

Alabama provides an exceptional academics program that will provide you with many opportunities for your future. There are lots of different graduate and undergraduate programs offered at UA. With about 13 different schools on campus, even an honors college, Alabama is worth considering. And for those of you who like to read, you'll be glad to know that Alabama has 8 libraries on campus. Alabama has many opportunities and challenges for you to achieve. It's easy to see why students want to go to the University of Alabama.

Not only does UA have an exceptional athletics program and a cutting edge academics program, you can get it all for an affordable price. The estimated cost for tuition and fees, for an Alabama resident, is \$5,085. The estimated cost for an out of state resident is \$12,975. Now add all the dining, books and other necessities, and the total estimated cost for a resident is \$12,865. A non-resident, not being much more expensive, is \$20,755. So now you know, that wherever you live, you can go to UA for an affordable price.

Now you know, UA is the perfect place for you. With an outstanding athletics program and a mind-blowing academics program, UA is as close to perfect as you can get. And to top it all off, you can access all of this greatness for an affordable price. So pick up that pen and start applying to the University of Alabama so you can be a part of The Capstone of Higher Education, and plan a terrific future for yourself. Roll Tide Roll!

Sincerely,

Kunjai Bastola

Vincent Van Gogh

Vincent van Gogh was born in Holland in the year 1853. Growing up he wasn't very happy which showed in his self-portraits because he never smiled. He went through many careers before he became an artist. To improve his art skills, he went to many art schools in his lifetime. Van Gogh's first paintings were of poor people. The paintings were very sad and dark. He wanted people to know how hard it was to be poor at the time.

Later on van Gogh discovered colorful Japanese artwork. That changed his oil paintings into something completely new. He started to add color into his artwork. In 1886, Vincent move to Paris, France to join his brother

Theo. Paris was the center of this art world at the time, so it made sense for a painter to be there. Three of Van Gogh's most famous artworks were The Starry Night, Irises, and Cafe Terrace at Night. He painted a lot of landscapes, cityscapes, and sceneries.

Van Gogh was married to Johanna Van Gogh, they had problems in their relationship but never had kids. He didn't really care about much but his art. After all, it told us a lot about how he felt. Sometimes, he stopped buying food just so he could stock up on paint. He wasn't a very healthy person. Not only was he unhealthy but he was very angry. After he painted Wheatfield with Crows which had a scary sky, he shot himself and two days later died in 1890.

Venus

Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Those are the eight planets in our solar system. In order from the closest planet to the sun and the farthest planet from the sun. They all have information and facts about them. Here is some information and facts about the planet Venus. Venus is the second planet away from the sun. It is a terrestrial planet. A terrestrial planet is a planet that has a solid rocky surface. Excluding the moon, Venus is the brightest thing in the night sky. Venus is the brightest, just before the sun rises, and sets. Venus is the planet that comes closest to the Earth. Venus is similar to the Earth only by its size and gravity. Other than that Venus and Earth are very different. In the atmosphere of Venus, there is mostly carbon dioxide, and clouds with surface acid, or a chemical that is very poisonous to humans. Until the twenty-first century, people thought things may live on Venus. Unlike the Earth, Venus has no moons. Venus spins its axis very slowly. It also spins the the other direction than other planets. Venus completely orbits the sun in 224.7 Earth days. Venus is named after the Roman goddess of love and beauty. Venus is the hottest planet in the solar system, even though the planet Mercury is the closest planet to the sun. Those were some of the facts and some of the information about the planet Venus.

हस्पिटलमा आमासंग

विरामी आमा सुतेको बेडमा छेवैमा बसेर
आमाको स्वास्थ्य सेवाको लागि सकेको गरेर
ती स्वास्थ्य कर्मी आउने जाने कुरेर बस्छु म
आमाको हात छातिमा राखी कामना गर्छु म ।

आमाको काख आमाको माया ममता आमाको
नघटने रैछ सिकिस्त हुदा त्यो प्यार आमाको
के खाँयो छोरी निदाको छैनो हैरानी ठूलो भो
त्यो सोधी खोजी हरेकपल्ट आमाको चिन्ता भो ।

हिजो झैं लाग्छ आमाको काख साथमा खेलेको
पुरानो याद फनन घुम्छ मायाले जेलेको
सम्झना सबै स्वर्णमि बनी बसेको मनमा
आमाको गाथा आमाको माया यो छाति माझमा ।

रोगले गल्दा पीडाले ढल्दा सिकिस्त बनेर
सुतेको बेला यौवना जस्तै आमा नै बनेर
विगत सबै मनमा गुनी के सोची राख्दी हौ
मायाको खानी सुम्पने कुरा मनमा सोच्दी हौ ।

ब्रम्हाण्ड सबै आमामै बनी घुमेको देख्छु म
निस्वार्थ माया जाँजहा देख्छु आमा नै भेट्छु म
जति नै सेवा आमाको लागि अपुरो हुन्छ त्यो
आमाको अघि संपूर्ण स्वर्ग अधुरो हुन्छ त्यो ।।

Mother's Day

My mom is someone who shines bright as the sun, travel the whole world and you'll see that there is a halo on top of my mom's head floating a feet up you can tell she stands out. Then you will know that, that's my mom. My mom the one who is artistic, understanding and of course she loving. My mom is artistic to support this is when me and my brother were kids we always used to fight and the thing that always cheered us up was when my mom an us did these paper curly flowers, we did fun games, when my brother needed to do an art project 3 years back he needed to draw a mummy so he asked my mom and my brother loves art, the last reason is when I was at preschool me and my mom always made oragami. My mom is understanding to support this statement is when my brother had hard times understanding homework my mom was there to help him even though she didn't understand, when I had trouble doing homework my mom was there to help, the last reason is when I had bad days she was there to help me without even a second thought. My mom is loving to support this is when I was little she brought my cousins at her house in Nepal, when I get hurt she picked me up with love, the last reason of all is when anyone comes to our house as a guest my mom is always the one who makes them tea. That's why I think my mom is someone who stands out. My mom is someone who is artistic, understanding and of course loving. I hope you understand why she is the world to me.

Global Warming Affecting Animals

Animals all over the worlds have been put on the endangered species list. The top reason for all of them being there is always us humans. We have directly caused their populations to decrease by hunting them for their meat, fur, and maybe even bones. There now is a new way we are contributing to their disappearance. You guessed it- by fueling climate change.

The fall of many species is on its way, with global warming guiding it. The extra greenhouse gases humans are emitting into the air selfishly is causing species to slowly go extinct. This doesn't stop only there. Plants and animals are important to their ecosystems, which are soon to be affected if nothing is done about the number of animals lowering. For example, the snow leopard population is plummeting because of the increase in temperature. Snow leopards live in the mountains and their habitats are in snowy, cold areas. Because of climate change, the snow on the mountains is traveling upwards and the leopards follow it. The higher the leopards go, the more scarce food is, and the more competition for the limited amount of food. If the snow leopard population ceases to exist, their prey will thrive in the ecosystem, which then, will lead to the prey's food decreasing. It causes a domino effect, and the only way to prevent it is to stop the first domino before it has a chance to knock the second down.

Many things are caused by climate change. The endangered animals are only a fraction of what global warming can do to the Earth and its creations. Our only hope now to keep us and the world from frying is to stop adding heat to the already boiling pan. Make better choices for the environment, limit polluting the air as well as the land and water, and be sure the only imprints you leave on the earth are the ones that won't scar it. The only way to go is the right direction.

Happy Mothers Day

Mothers' Day, Mothers' day
 What a great day
 Will she like what I give her today?
 Breakfast in tray?
 Or a great big card?
 What will she like?
 I wonder what?
 A day for moms,
 A day for love,
 A day for sweetness,
 Is what I love.
 May is here, May is here,
 I am so excited!
 It's mothers' day, its mothers' day
 It's the big day
 I'm so excited for today
 Share your love, share your happiness
 It's your time for the day
Happy Mother's Day!!!

Plastic Waste: A Growing Cause

Did you know that an average human wastes approximately 185 tons of plastic each year? Or that only 25% of all plastic made is recycled? And where does all this unrecycled plastic go you ask. Here's the answer: All them plastic that is thrown away, left as litter, or has just been floating by, is eventually going to end up in the ocean. Most of which will go to the Great Pacific Garbage Patch.

The Great Pacific Garbage Patch is a collection of plastic debris in the North Pacific Ocean. Marine debris is litter that ends up in oceans, seas, and other large bodies of water.

The Great Pacific Garbage Patch is actually two places in the ocean. The Western Garbage Patch is close to Kuroshio, Japan and the Eastern Garbage Patch is close to the Californian Islands. These two "Islands" have strong currents around each other like the shape of an oval. And in between little pieces of plastic and debris will float in the power of the currents.

Mothers

Mothers are important. Without mothers no one can born. Mothers keep us in her tummy and when they give birth they almost die because of the pain. They teach us how to walk, how to read, how to play and everything. When we are sick they wake up all night and taking care of us. Mothers are a God gifted. They love us so much. Sometime they are mad with us when we did something wrong. I don't worry about

my stuff because of my mom taking care of everything. First she feed me before she eats. I can't imagine a life without my mom. Thank you all mothers in this world and my Aama. Happy Mothers Day
